

RANGELAND PROGRAM SUMMARY UPDATE

Dear Interested Public:

We wish to inform you of the changes that have occurred in the range management program in the area administered by the Newcastle Field Office (NFO). There are several items identified in the Range Program Summary (RPS) update of 1990 that need to be updated. Following is a discussion of those items.

Grazing Management Plans - The original RPS of 1984 estimated that 20 to 30 formal grazing management plans would be completed in ten years. However, only two were completed prior to the RPS update of April, 1990. Since then, four more Allotment Management Plans (AMPs) have been completed, for a total of six AMPs. These are as follows:

<u>Allotment Number</u>	<u>Operator</u>	<u>Allotment Category</u>
04409	Mark Busenitz	"I" (Intensive)
04039	F.A. Bush	"I"
04387 & 4039	F.A. Bush	"I"
04319	J.O. McDonald	"I"
04360	Battle Creek Ranch	"I"
04119	Mickey Simon	"M" (Maintenance)

There are currently five "I" allotments in the area administered by the NFO, and all five allotments have an AMP. Most of the allotments within the area administered by the NFO have isolated BLM tracts with predominately private land. Therefore, a formal AMP is not practical for most allotments. As the Wyoming Standards for Rangeland health assessments are completed, allotments may have an AMP written depending on resource concerns or the amount of BLM acreage within a pasture/allotment. Therefore, an estimate of the number of AMPs to be implemented would not be accurate.

Allotment Classification - Monitoring data and resource concerns have indicated a need for reclassification of two "I" allotments. The following changes are being proposed:

<u>Allotment Number</u>	<u>Operator</u>	<u>Current Category</u>	<u>Proposed</u>
04207*	Mark Busenitz	"I"	"M"
04319**	J.O. McDonald	"I"	"M"

*Allotment 04207 has an AMP in place, and based on a field assessment in 2002, the allotment appears to be in good condition. No identified riparian areas exist on this allotment, and no other resource concerns exist. A Standards for Rangeland Health assessment has been completed, and this allotment met all standards that could be measured. Therefore, an intensive monitoring program is not needed for this allotment.

** Allotment 04319 has had a Wyoming Standards for Rangeland Health assessment completed, and was in compliance with all standards that could be determined. In addition, an AMP is in place for this allotment, and due to the small amount of BLM acreage (938 acres) extensive monitoring is not required for this allotment.

Monitoring data and resource concerns have indicated a need for reclassification of four "M" allotments and one "C" allotment. The following changes are being proposed:

<u>Allotment Number</u>	<u>Operator</u>	<u>Current Category</u>	<u>Proposed</u>
04280*	Rocky Point	"M"	"I"
04119**	Mickey Simon	"M"	"I"
14009***	Paul Baker	"M"	"C"
04281****	Fern Porter	"M"	"C"
04040*****	Ken Hutton	"C"	"M"

*Allotment 04280 had areas of concern based on a field visit made in 2002. In addition, the total acres of BLM (7,628 acres) and some possible riparian exclosures indicate a need for more intensive monitoring. An AMP may be implemented in conjunction with a Wyoming Standards for Rangeland Health assessment that is scheduled for 2003.

**An AMP was implemented in 2002 for allotment 04119 in response to a Wyoming Standards for Rangeland Health assessment, and subsequent AMP, which indicates that utilization data will be collected yearly, and trend studies will be read every third year.

***No major resource concerns exist.

****Scattered tracts of BLM, with no major resource concerns.

***** Riparian areas exist within this allotment, and a more intensive monitoring level is needed.

Allotment Categorization - Factors used in evaluating the allotments include range condition, rangeland health, present management, resource concerns, potential conflicts and controversy, potential for positive economic returns on investments, and amount of public lands within an allotment/pasture. A complete description of allotment categorization can be found in Appendix 1 of this document. Some "C" (Custodial) allotments no longer exist because of land sales.

Monitoring - Monitoring levels will be addressed in the Newcastle Field Office Monitoring Plan (pending). Generally, category "I" and "M" allotments have monitoring data collected every three to five years, and "C" allotments as time allows. Appendix 1 shows the year an allotment was monitored, and the condition/apparent trend of the range resource the last year the allotment was monitored.

Grazing Leases and Transfers - As stated in the Record of Decision and Approved Management Plan for Public Lands Administered by the Newcastle Field Office, "Permitting livestock grazing use up to recognized active preference will continue until a change in resource conditions indicates that an adjustment is needed." Numerous grazing lease transfers have taken place since 1990, and some allotment boundaries have been adjusted. See appendix 1 for allotment categorization, operators and operator numbers, allotment numbers, and BLM acreage and AUMs (Animal Unit Months).

Agreements and Decisions - There is currently a signed agreement with the U.S. Forest Service, BLM, and David Lamb on grazing lease 49-0422, regarding 1,761 acres of BLM, and the associated 181 AUMs. The lease is managed by the U.S. Forest Service in a Community Allotment Management Plan.

Range Improvements - The construction of range improvements on BLM lands is normally a cooperative effort between the BLM and the livestock operator. Under normal circumstances, the BLM will provide the total cost for materials for pasture fences, pipelines, and livestock reservoirs. The agreement will identify whether the operator or the BLM will construct the project. Maintenance of the project is usually a requirement placed on the operator through the cooperative agreement. The BLM will normally provide funding for range improvement projects on "I" and "M" allotments. The development of projects on BLM lands are dependent on funding and other time commitments that may be placed on BLM personnel.
